Re: Site plan Application  
5/6 Frank Davis Place  
Waste Management Plan

To: Planning Department

The proposed new development at 5&6 Frank Davis Street is expected to be used primarily as storage space for various clients. Our client expects that the units may be used to store cars, motorcycles, recreational vehicles, etc. He also expects that there may be some contractors who would want to use the space to store materials for their trade.

As such, our current expectation is that the generation of waste will be minimal, consisting of more domestic types of waste – paper, cardboard, and that the volume will be quite low.

Therefore, the plan that has been submitted includes a waste bin enclosure, based on the expectation that bi-weekly removal of waste by a commercial contractor will be sufficient. The enclosure also has room for a set of recycling bins as well.

We trust that the above information is sufficient for your present purposes.

Sincerely

Pete Van Grootheest
