Hello Marc,  
Attached are our latest thoughts on the issue of not allowing prime agriculture within the Burnt Lands ANSI. We conclude that we may have to go slightly beyond the PPS to resolve this issue.

RE:OP/zoning Am

Further to my email April 5 2022 I confirm my objection to the rezoning and OP amendment designating my lands

Comprising the north Half of the east half of lot 23 concession four and theNorth half of the west half of Lot 23 concession five

Because these lands are either forested or non-tillable in their present state as more particularly described

In my afore mentioned email—the designation as agricultural with all its limitations effectively removes these lands

From any use other than conservation lands and in my opinion this amounts to expropriation of these lands

At the very minimum I require that A municipal representative attend at the site to confirm my comments

As to the status of these lands at a time convenient to myself And the municipal representative  
Thank you very much and I hope to hear from you soon
